

CANON SOLUTIONS AMERICA

Canon's Enterprise Managed Services Division (EMSD) provides custom managed services solutions for enterprise clients. We offer expertise in the planning and operation of non-core, business critical support functions, including management of copier/printer fleets, mail and copy centers, scanning technology and workflow, and general office services.

For several years EMSD has made strategic partnerships an integral part of its higher education model, recognizing the shift in forward-thinking institutions away from a 'traditional' vendor-customer relationship. Focused on aligning with financial, productivity and environmental initiatives that yield sustainable results, we deliver a long-term process of transformation that is beneficial to students, faculty and administration.
