Payment Processor Breach May Be Largest Ever

A data breach last year at Princeton, N.J., payment processor **Heartland Payment Systems** may have compromised tens of millions of credit and debit card transactions, the company said today.

If accurate, such figures may make the Heartland incident one of the largest data breaches ever reported.

05 Target Hackers Broke in Via HVAC Company

FEB 14

Last week, **Target** told reporters at *The Wall Street Journal* and *Reuters* that the initial intrusion into its systems was traced back to network credentials that were stolen from a third party vendor. Sources now tell KrebsOnSecurity that the vendor in question was a refrigeration, heating and air conditioning subcontractor that has worked at a number of locations at Target and other top retailers.

Sources close to the investigation said the attackers first broke into the retailer's network on Nov. 15, 2013 using network credentials stolen from **Fazio Mechanical Services**, a Sharpsburg, Penn.-based provider of refrigeration and **HVAC** systems.

Fazio president **Ross Fazio** confirmed that the **U.S. Secret Service** visited his

Gmail will no longer snoop on your emails for advertising purposes

By **Brian Fung** June 26, 2017 [✉ Email the author](#)

(Virginia Mayo/AP)

Google is making a change to its advertising practices that will affect millions of Gmail users around the globe. Starting later this year, the company will stop reading your emails to refine its ads.

A silver SUV is parked on a steep, rocky roadside. A person is standing near the rear of the vehicle. A sign on a post next to the car reads "NO GOATS" with a crossed-out goat icon, "STOP GOATERS", and "GOAT UP" in red. The background shows a steep, rocky hillside with power lines and a valley below. The text "Are cloud service threats to data any different than those to your own data center?" is overlaid in white.

Are cloud service threats to data any different than those to your own data center?

What is the “cloud”?

Software as a Service - SaaS

Platform as a Service - PaaS

Infrastructure as a Service - IaaS

Reasons to Go Cloud

- Lower Your Costs* and Capital Expenditures
- Modernize IT
- Scalability
- Agility
- Disaster Recovery and Business Continuity
- Superior Engineering
- Optimize IT Staff Resources

Creating Notre Dame's
IT future

CLOUD FIRST

WE NEED WHAT THE CLOUD OFFERS

Demand for IT services will
continue **INCREASING**

Funding and staffing
remain **CONSTANT**

We must find **NEW WAYS TO EXCEL**
in delivering IT services

HOW WILL WE GO TO THE CLOUD?

Software as a Service (SaaS)

Platform as a Service (PaaS)

Infrastructure as a Service (IaaS)

On-Premises

We will only turn to on-premises solutions when a service has a compelling reason for physical proximity to campus

Why SaaS & PaaS?

Leverage high quality commodity solutions

Maximize time spent to address unique ND needs

Why IaaS?

Pay only for the resources we use

Add or remove resources quickly

Avoid managing multiple physical data centers

Why Amazon Web Services For IaaS?

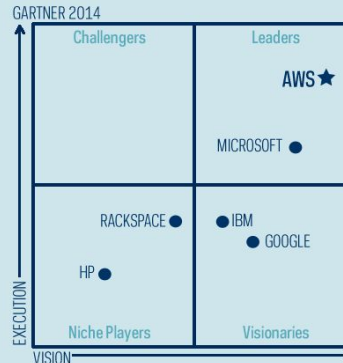

Most advanced data centers in the world

Proven pace of innovation

Relentless focus on customer success

What Cloud First Means For YOU

Timely access to the most advanced IT tools

Opportunities for innovation and integration

Professional development you need to succeed

TO MEET OUR GOAL OF IT SERVICE EXCELLENCE:

We will move **80%** of Notre Dame IT services into the cloud by ^{Dec 31} **2017**

ND already has more than 100 IT services in the cloud.

Join the conversation at  **#NDCloudFirst**
