

Higher education is the necessary bridge between current challenges and future solutions. Students and faculty must be empowered with both the relevant data and the insight and ability needed to make it useful. This starts and ends with smarter IT choices from device to data center, and only Lenovo has the proven portfolio of solutions and partnerships necessary to empower diverse stakeholder needs around research, creativity, and the discovery of new skills and opportunities.

Students aren't just connecting from across campus or the community. Today's campuses have an impact that reaches well past their physical borders, driving radical exploration and deep collaboration that connects students to a quickly expanding world of new expertise and applications. Lenovo is committed to helping higher education build a dependable new global connectivity that makes learning more effective while reducing cost, complexity, and risk.
