

Aleph Working Group November 14,2007, 10:30-12:00 President's Room Cushwa-Leighton Library, Saint Mary's College

Agenda:

1. Duplicate barcode discussion summary (15 mins.)

See meeting minutes at: AWG barcode discussion

group, <https://libwiki.library.nd.edu/bin/view/MalcWiki/AlephWorkingGroup20071108Minutes>

Updated numbers from Tom:

Institution	Total Items	00 Barcodes	Overlap w ND
Saint Mary's	241,869	202,148	161,186
Bethel College	118,090	65,954	53,084
Holy Cross College	16,979	12,349	9,336

So, each institution has a reasonable percentage of records which have 00 type barcodes but don't overlap **with ND**.

The next thing to do is to look at records between other institutions. I took a look at SMC and found that the following:

Overlap between SMC and BCI: 62,364

Overlap between SMC and BCI not accounted for in the ND/SMC overlap: 12,774

Overlap between SMC and HCC: 11,489

Overlap between SMC and HCC not accounted for in ND/SMC overlap or BCI/SMC overlap: 725

So, if we were only re-barcoding overlapping records instead of everything, we'd need to re-barcode:

$161,816 + 12,774 + 725 = 174,685$

items, which is about 86% of the total 00's. Probably worth doing the whole works.

Just for comparison and completeness:

Overlap between HCC and BCI: 8449

Overlap between HCC and BCI not accounted for by any other re-barcoding efforts: 62

So, again, with Holy Cross, just re-barcoding duplicates would hit

$9336 + 725 + 62 = 10,123/12,349 = 82\%$ of the 00 barcodes

and Bethel comes out with a whopping:

$53084+12774+62 = 65920/65954 = 99.9\%$ of the 00 barcodes which are overlapping with someone anyway.

So there we'd be **way** ahead by just re-barcoding everything.

Hope these numbers help to make our case. Let me know if you need more information.

Tom

2. OCLC reclamation project & serial holding refresh (30 min.)

- original goal to update ND serial holdings in OCLC; expanded discussion to include all holdings - no cost for reclamation projects or local data record updating - are the colleges interested in also updating their OCLC holdings? - our INCOLSA contact: [Collette Mak](#)

- see: OCLC Concise Batch Processing

Guide, http://www.oclc.org/support/documentation/batchprocessing/using/concise_guide/default.htm

- see: OCLC Batchload order form, <https://www3.oclc.org/app/batchload/>

- there will be a charge for sending the serials holdings because we have holdings in 866 not 853/863 paired fields

- Kitty and others may join us at the Monday meeting

- Laura forwarded message from Collette Mak re: OCLC providing records for overlay locally

- who do we talk to at OCLC regarding reclamation project? Ask Collette Mak

- we do not have true OCLC numbers in 035 in legacy OCLC records, so if this is a match point, this won't work for us

- Pascal will set up separate meeting reclamation project after Thanksgiving

3. Update: Cross-campus circulation recording for MALCs

- this is now in place for all four MALCs and Law Library; Tom added this some time ago

- next, we need to ask MALC Directors and ND ADs

4. Results of Aleph 20 enhancement voting

- Pascal summarized the Aleph 20 voting, which was sent out to ALEPH-NA by Betsy Friesen

5. Other topics?

- if you have other topics you'd like to also discuss, feel free to bring them up here

- MARCIVE authority updates:

- configuring tables with UPD=Y; reindexing needs to be done, then set UPD=Y

- Phil has been consulting with Sandy Card, SUNY Binghamton

- we have not exported any further data from Oct. 1 to MARCIVE

- status of Tantar project? Nothing is being added as of yet

- we showed Fr. McGarry [?](#) the OPAC; INCOLSA in process of establishing new institution code for Tantar; we can wait until spring or summer for moving the OPAC files to production

- there may be pressure to complete the project within the year; perhaps new temporary personnel hired for this purpose

- how do we want to handle the union catalog component of the MALC Directors?

- there was some discussion on relative merits of Aleph union catalog when we are 5 years away from end of life of product

- union catalog would not provide added features available in 'next generation' platforms

- people tend to look more broadly for information these days as opposed to locally; they want regional availability

- Aaron, Kitty, Sarah, Kevin, Pascal will work on this initially

- Aaron demoed the OCLC [WorldCat](#) [?](#) links in Aleph - next mtg.: Dec. 12, 222A Hesburgh, 10:3-noon

-- [PascalCalarco](#) - 14 Nov 2007
