

Aleph Working Group: February 2010 Meeting

248 Hesburgh Library, 10:30-11:30 am

Agenda:

- Aleph 20 Testing Status (all)
- Aleph 20 Scripting Status (Justin & Aaron)
 - MARCIVE and some other batch loading testing will proceed after 20.1 in place on timothy
 - patron load testing started this past week
 - most circ notices tested and working
- Aleph 20 Server & components Status (Tom)
 - cannot use secure SMTP for email notices because they do not support SSL
 - cannot use LDAP/Kerberos authentication because it is all/nothing, and since not all MALC members use Kerberos, we will stick with current local user authentication within Aleph for staff
- Aleph 20 Table changes (all)
 - tab16 substantially cleaned up; tab15 still in progress for ND; other MALCs in place
 - tab31 next to clean up
 - these are tables that we know about now; new functionality will have other table changes
 - borrower type consolidation analysis in progress as well
- Aleph 20.1 Upgrade
 - this will be put into place this Friday for current functionality testing starting next week; about 540 software changes; mostly Cataloging, Circ and Web OPAC areas
- Tom's reports and migration to Data Mart (Pascal)
- Other topics
