- [3] **A. Simon**, F.Naqvi, *Indirect determination of neutron-capture cross sections on Sm isotopes*, Physical Review C 101 (2020) 014619 Impact factor: 3.146

Contributions: I developed a method to calculate neutron-capture cross sections with uncertainties obtained from a Monte Carlo method. For the purpose of these calculations, I modified a statistical model code to include functionality required for this work. The calculations are based on the statistical properties of Sm nuclei that I measured in my previous work. Farheen, former postdoc in my group (now an assistant professor, University of Delhi) provided insight to the method and details for the input parameters and their uncertainties.
