---

SUMMER 2017

LUIS PRIEB

# AT THE BASE

---

- Plone is a free and open source content management system built on top of the Zope application server.
- Plone lets non-technical people create and maintain information for a public website or an intranet using only a web browser. Plone is easy to understand and use - allowing users to be productive in just half an hour - yet offers a wealth of community-developed add-ons and extensibility to keep meeting your needs for years to come.

# EVEN DEEPER

---

- Zope is a leading Open Source Application Server and Content Management Framework, specializing in content management solutions, portal content management, and custom applications.
- Object Oriented Database

## Medical Imaging Technologies: Views to a Cure

Emerging imaging technologies are being used to improve the quality of images available for more accurate diagnoses and treatment, assess radiation dosing, and find causes and cures for a variety of diseases.

## Welcome to the Department of Computer Science and Engineering

Teaching and research efforts in the department encompass algorithms and theory; computer vision, artificial intelligence, and data mining; bioinformatics and computational biology; security; Web services; computer architectures; software engineering; and distributed systems and grid computing.

## Faculty

by [Cheryl Kelly](#) — last modified Sep 20, 2017 09:52 PM — [History](#)

### Richard E. Billo

Professor and Associate Vice President for Research

*Ph.D., Industrial Engineering, Arizona State University*

### Kevin W. Bowyer

Schubmehl-Prein Family Professor of Engineering  
Professor of Computer Science and Engineering  
Concurrent Professor of Electrical Engineering  
Director of International Summer Engineering Programs

IEEE Fellow, IAPR Fellow

*Ph.D., Computer Science, Duke, 1980*

Computer vision and pattern recognition, including biometrics, data mining, object recognition and medical image analysis.

### Jay Brockman

Professional Specialist and Associate Dean of Community Engagement and Experiential Learning for the College of Engineering

*Ph.D., from Carnegie Mellon University in 1992*

Professor and Associate Vice President for Research

*Ph.D., Industrial Engineering, Arizona State University*

## Schubmehl-Prein Family Professor of Engineering

Professor of Computer Science and Engineering  
Concurrent Professor of Electrical Engineering  
Director of International Summer Engineering Programs

IEEE Fellow, IAPR Fellow

# OTHER FEATURES

---

- Version Control
  - Tracks edits, allows rollback
- Setting Views to Folders
- Create different views for different for grouped Data following a set ordering, filtering, and other specified rules (Called Collections)
- Add And Create Portlets
  - Include search bar, navigation bar, login view, etc..
- Creating New Portlets
- Different Permission Groups
