

# Contents

<b>1 Basic Properties of Holomorphic Functions</b>	<b>13</b>
1.0 Notation and complex numbers . . . . .	14
1.1 Complex differentiation and holomorphic functions . . . . .	17
1.2 Real and complex differentiation . . . . .	24
1.3 The chain rule and inverse functions . . . . .	32
1.4 Conformal mappings . . . . .	37
1.5 Linear fractional transformations . . . . .	43
1.6 Notes on Chapter 1 . . . . .	54
<b>2 Complex Integration</b>	<b>57</b>
2.1 Complex line integrals . . . . .	58
2.2 Cauchy's theorem and Cauchy's integral formula . . . . .	68
2.3 Cauchy's integral formula for derivatives . . . . .	73
2.4 Cauchy's estimates and applications . . . . .	77
2.5 Sequences of holomorphic functions . . . . .	82
2.6 Power series . . . . .	85
2.7 Holomorphic functions as power series . . . . .	89
2.8 Notes on Chapter 2 . . . . .	93
<b>3 Singularities and the Residue Theorem</b>	<b>95</b>

3.1	Zeros of holomorphic functions . . . . .	95
3.2	The Laurent series . . . . .	99
3.3	Poles and essential singularities . . . . .	104
3.4	The residue theorem and applications . . . . .	107
3.5	Notes on Chapter 3 . . . . .	123
<b>4</b>	<b>Holomorphic Mappings and Simply Connected Domains</b>	<b>125</b>
4.1	The mean value property and maximum principle . . . . .	126
4.2	The argument principle and applications . . . . .	129
4.3	The Schwarz lemma and automorphisms of the unit disk . . . . .	138
4.4	Function theory on simply connected domains . . . . .	142
4.5	Normal families and Montel's theorem . . . . .	148
4.6	The Riemann mapping theorem . . . . .	151
4.7	Notes on Chapter 4 . . . . .	154
<b>5</b>	<b>Prescribing Zeros and Poles</b>	<b>157</b>
5.1	Prescribing poles on $\mathbb{C}$ . . . . .	157
5.2	Prescribing zeros on $\mathbb{C}$ . . . . .	163
5.3	Runge's theorem . . . . .	175
5.4	Prescribing zeros and poles on general domains . . . . .	181
5.5	Notes on Chapter 5 . . . . .	186
<b>6</b>	<b>The Inhomogeneous Cauchy-Riemann Equation</b>	<b>187</b>
6.1	The generalized Cauchy integral formula . . . . .	188
6.2	The inhomogeneous Cauchy-Riemann equation . . . . .	192
6.3	Applications of the $\bar{\partial}$ -equation . . . . .	199
6.4	The Plemelj jump formula . . . . .	209
6.5	The Cauchy problem for $\bar{\partial}$ . . . . .	214
6.6	Notes on Chapter 6 . . . . .	219

<b>7 Riemann Surfaces</b>	<b>221</b>
7.1 Riemann surfaces and holomorphic maps . . . . .	222
7.2 More examples of Riemann surfaces . . . . .	226
7.3 Multiple-valued functions . . . . .	233
7.4 Local properties of holomorphic maps . . . . .	242
7.5 Holomorphic maps on compact Riemann surfaces . . . . .	249
7.6 Topology of compact Riemannn surfaces . . . . .	258
7.7 Notes on Chapter 7 . . . . .	266
<b>8 Harmonic Functions and the Dirichlet Problem</b>	<b>267</b>
8.1 Harmonic functions . . . . .	268
8.2 The Poisson equation and Newton potentials . . . . .	282
8.3 The Dirichlet problem . . . . .	291
8.4 Green's function . . . . .	304
8.5 Weyl's lemma and the Dirichlet principle . . . . .	312
8.6 Notes on Chapter 8 . . . . .	322
<b>9 The Dirichlet Problem: <math>L^2</math> Techniques</b>	<b>325</b>
9.1 The energy method . . . . .	326
9.2 Sobolev spaces and the Rellich lemma . . . . .	336
9.3 The Dirichlet norm and Poincaré's inequality . . . . .	338
9.4 $L^2$ Theory for $\bar{\partial}$ . . . . .	348
9.5 Deeper properties of the Green's operator . . . . .	353
9.6 Notes for Chapter 9 . . . . .	365
<b>10 Function Theory on Compact Riemann Surfaces</b>	<b>367</b>
10.1 The Cauchy-Riemann equation . . . . .	368
10.2 Meromorphic functions and forms . . . . .	373
10.3 The Riemann-Roch theorem . . . . .	383

10.4 Finite dimensionality of $\mathcal{O}^1(X)$ . . . . .	393
10.5 Harmonic theory on compact Riemann surfaces . . . . .	402
10.6 The de Rham-Hodge theorem . . . . .	415
10.7 Notes on Chapter 10 . . . . .	421
<b>11 The Uniformization Theorem</b>	<b>423</b>
11.1 The uniformization theorem . . . . .	424
11.2 The Dirichlet problem: Perron's method . . . . .	427
11.3 The Dirichlet problem: $L^2$ methods . . . . .	431
11.4 Normal families . . . . .	436
11.5 Uniformization for non-compact surfaces . . . . .	438
11.6 Uniformization from a geometric point of view . . . . .	443
11.7 Notes on Chapter 11 . . . . .	450
<b>12 An Introduction to Several Complex Variables</b>	<b>453</b>
12.1 Holomorphic functions in several variables . . . . .	453
12.2 The inhomogeneous Cauchy-Riemann equations . . . . .	462
12.3 Domains of holomorphy . . . . .	466
12.4 Pseudoconvexity . . . . .	470
12.5 The Levi problem . . . . .	476
12.6 Notes on Chapter 12 . . . . .	483
<b>Appendices</b>	<b>484</b>
<b>A Compactness in Function Spaces</b>	<b>485</b>
A.1 Compactness in $\mathbf{R}^n$ . . . . .	485
A.2 Uniform convergence . . . . .	485
A.3 Compactness in function spaces . . . . .	486
<b>B Hilbert Spaces</b>	<b>491</b>

B.1 Basic properties . . . . .	491
B.2 Projections in Hilbert spaces . . . . .	494
B.3 The Riesz representation theorem . . . . .	496
B.4 Linear operators on Hilbert spaces . . . . .	497
<b>C Integral Kernels and Fourier Series</b>	<b>503</b>
C.1 Fourier series . . . . .	503
C.2 Separation of variables . . . . .	504
C.3 The Poisson and Cauchy kernels . . . . .	510
C.4 Integral kernels for the upper half plane . . . . .	512
<b>D Fourier Transforms and the Rellich Lemma</b>	<b>515</b>
D.1 Fourier transforms . . . . .	515
D.2 The Rellich lemma . . . . .	517
<b>E Distributions and Fundamental Solutions</b>	<b>521</b>
E.1 Test functions . . . . .	522
E.2 Distributions . . . . .	525
E.3 Differentiation of distributions . . . . .	528
E.4 Convolutions . . . . .	531
E.5 Fundamental solutions . . . . .	533
<b>F Cohomology on a Riemann Surface</b>	<b>539</b>
F.1 Partitions of unity . . . . .	539
F.2 The $d$ operator . . . . .	540
F.3 The $\bar{\partial}$ operator . . . . .	543
F.4 The de Rham theorem . . . . .	545
F.5 The Dolbeault theorem . . . . .	548
<b>G Analytic continuation and the monodromy theorem</b>	<b>553</b>

G.1	Analytic continuation in a Riemann surface . . . . .	553
G.2	The monodromy theorem . . . . .	557
G.3	Applications of the monodromy theorem . . . . .	559
<b>Bibliography</b>		<b>562</b>
<b>Index</b>		<b>568</b>
