

NUITS & BOLTS

ARCHIVES WORKSHOP

This intensive workshop targets graduate students interested in conducting archival research. Participants will acquire a solid foundation in archival terminology, how to identify and use archives, and other fundamental skills.

The workshop will introduce best practices and some of the crucial cultural and practical differences between libraries and archives. It will also give attendees hands-on practice reading and transcribing different handwritings from various time periods, identifying important parts of manuscripts, and reading historical maps. We will also cover select participant-requested topics.

Monday-Friday, August 1-5, 2016

9 am-noon

Hesburgh Library 103

Special Collections Seminar Room
