

# Ardipithecus Ramidus

Those that know me and love me call me 'Ardi.' I am 4.4 million years old, but with age comes experience and I'm always down for a good time. I'm fun sized at 3'11" and the best things come in small packages, so swipe right ;)

## Best Physical Features

I've got long arms to hug you with and large grasping hands for climbing, but they serve many purposes if you know what I mean... they're great to hold!

## On a typical weekend I'll be...

'Hanging out' in the trees or going for a stroll in the Afar Depression of the Middle Awash River Valley in Ethiopia, come join me!

## Special Skills

I've got the best of both worlds kind of locomotion, I'm arboreal and a facultative biped

## Perfect First Date

Watching a sunset through the wooded forest over the savanna grassland, so romantic 10/10 wouldn't disappoint

## Ideal partner

Looking for a loyal and committed man to settle down with, I know y'all out there somewhere!

## 5 Things I can't live without

1. Custom shoes that accommodate my opposable toe
2. Trees, I love to climb
3. My car, I don't like to walk long distances
4. Friends because I am popular
5. You ;)

## Favorite Foods

I'm a raw fruits and fibrous veggies kind of gal, the latest trending vegetarian diet

## Favorite Show

I love to binge watch Naked and Afraid. It's hilarious to see these more 'evolved' Homo sapiens struggle to survive 3 weeks in my African habitat.

You have features like mine cuz I'm amazing and I don't like sexual dimorphism
